¿QUÉ TIENE EN SUS MANOS?

Este cuaderno, elaborado por la maestra en pedagogía terapéutica Marina Casas Conde con la colaboración de ARASAAC y TEAyudamos, es una herramienta de apoyo a la comunicación para usuarios, familiares y profesionales con objeto de mejorar la comprensión en el entorno de la salud y la comunicación.

No hay un Sistema Alternativo/Aumentativo de Comunicación (SAAC) universal aunque esté basado en imágenes, por lo que además debemos utilizar todo aquello que pueda facilitar la comprensión de entornos y situaciones. Podemos hacer uso de gestos, objetos, fotografías, lenguaje escrito, sonidos... y por supuesto de la empatía, paciencia y disposición.

Ciertos usuarios usan pictogramas más sencillos o generales y otros elaboran secuencias más complejas, a otros quizá no les aporte ayuda este cuaderno, por lo que la formación del personal de salud en interacción con el paciente con discapacidad intelectual es una clave primordial en la asistencia sanitaria de calidad.

Cada unidad sanitaria puede disponer de al menos un ejemplar y los profesionales deben ofrecerlo a sus pacientes, no solo ante cualquier dificultad de expresión / comprensión o situación frustrante o disruptiva, sino como un derecho al acceso continuo del usuario a él.

Gracias.
